Allowable Subject Matter

1. Claims 1-5 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 3, Cutler et al. (6,219,340) discloses method and apparatus for displaying a code class, power levels, and code channels of CDMA signals (abstract, fig.2).

Kozumi (6,519,227), in the same field of invention, discloses a code class layer, power levels for each code class layer and code channels (abstract, figs. 4-5).

Agrawal et al. (6,879,576) discloses method and apparatus for transmitting code channels in an orthogonal transmit diversity in which code channels are assigned to either a first antenna or a second antenna (figs.3a, 4a-b, 5, column 5 lines 57-67, column 6 line 28 to column 8 line 6).

These references fail to teach or suggest **assigning** powers of the individual code channels to the respective antenna corresponding to the orthogonal transmit diversity in the determined **code class** and **displaying** the power levels of the code channels with the respective **antenna**.

Regarding claims 2, 4-5, these claims are allowed as being dependent upon independent claims that have been allowed.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
